10) Inventory information is provided in real time by a firm's accounting information system. The accuracy of this information is questionable, however, since the production manager often reports stock outs of components that the system indicates are in stock.

## **Accounting Information Systems, 13e (Romney/Steinbart ...**

1. What is a documentation of an AIS? It explains how AISs operate and is therefore a vital part of any accounting system. IT describes the tasks for recording accounting data, the procedures that users must perform to operate computer applications, the processing steps that computer systems follow, and the logical and physical flows of accounting data through the system.

## **Chapter 3 Systems Development and Documentation Techniques**

Accounting information systems (AIS) are only as good as the information entered into the system. While computerized AIS software has greatly reduced the man-hours needed to record and tabulate accounting information, the software must still be scrutinized and maintained daily for recording financial transactions.

## **Why Do Accounting Information Systems Fail? | Bizfluent**

2. False. The benefits obtained from information provided by the accounting information system must outweigh the cost of providing that information. 3. True. 4. False. An accounting information system must be cost effective, provide useful output, and be flexible enough to accommodate changing information needs. BRIEF EXERCISE 7-4

## **CHAPTER 7**

Accounting Information Systems, 14th Edition covers all of the most recent updates in AIS, including how developments in IT affect business processes and controls, the effect of recent regulatory developments on the design and operation of accounting systems, and how accountants can use the AIS to add value to an organization. Not only will ...

## **Amazon.com: Accounting Information Systems (14th Edition ...**

An accounting as an information system (AIS) is a system of collecting, storing and processing financial and accounting data that are used by decision makers. An accounting information system is generally a computer-based method for tracking accounting activity in conjunction with information technology resources.
