Are they really our cousins? One clue that tunicates are related to vertebrates is found in the tunicate larva, or tadpole. It even looks like a tiny tadpole, and has a nerve cord down its back, similar to the nerve cord found inside the vertebrae of all vertebrates. The Cerebral Vesicle is equivalent to a vertebrate's brain. Sensory organs include an eyespot, to detect light, and

Atlas of Marine Invertebrate Larvae. Academic Press. A few copies will be available in class. ASSESSMENT 1. Notebook (30%) All students are expected to maintain a high-quality laboratory notebook. The notebook should contain labeled drawings of eggs, embryos, and larvae raised by you, and organized by species.

Comparative Embryology and Larval Biology OIMB Spring 2013 ...

Abstract Marine invertebrate larvae have often been reared in artificial rather than natural seawater, either for convenience or to avoid potentially confounding effects of unknown contaminants. This study sought to determine the impact of artificial seawater on various aspects of development for three marine invertebrate species. We examined the impact of Instant Ocean on growth, survival, and ...
