D1.3 is for sheet steel applications. D1.1 is for structural plate, pipe, and shape applications. There is a cross over in available thickness of the above products in the 1/8 to 3/16 range. Real easy answer, if you are welding on sheet steel in this range then use the D1.3.

D1.1 vs D1.3.....? - American Welding Society

D1.3 is not contained in D1.1, but it is referred to, and D1.1 is referred to in D1.3. D1.1 is limited to steels less than 1/8" thick, and states that when metals thinner than 1/8" are to be welded, the requirements of D1.3 should apply. As far as I can see, there would be no basis for procedure qualifications for sheet metals in D1.1.

D1.1 vs. D1.3 - American Welding Society

AWS D1.8 is intended to be used on steel structures, where D1.1 applies. D1.8 should not, for example, be used to supplement AWS D1.6 Structural Welding Code—Stainless Steel7. See D1.8, clause 1.3. AWS D1.8 references the AWS A5 Filler Metal Specifications. Of particular interest is the reference to AWS
