relation to the size and shape for the maximum productivity and quality. The basic concept in canopy management of a perennial tree is to make the best use of the land, the climatic factors for an increased productivity in a three dimensional approach.

CRP 101: Canopy managementCanopy management is one of the most Page 1/26

important fruit plant management practice. This forms the basis of precociousness and longevity of the fruit trees in an orchard. ADVERTISEMENTS: The strong scaffold system help the trees to produce heavy crop loads of quality fruits without any major limb [...]

Canopy Management: Useful Notes on Canopy

Management Of Indeed, canopy management is the manipulation of tree canopy to optimize its production potential with excellent quality fruits. In many fruit crops, increase in production with enhanced fruit quality is obtained by managing canopies of short statured trees by using dwarf root stocks. Small trees capture and convert

sunlight into fruit production in a better way than larger ones.
