There is a growing perception that the governance of water resources and water services (and of many other things) functions more effectively within an open social structure which enables broader participation by civil society, private enterprises and the media, all networking to support and influence government.

What is water governance

The Water Governance Chair Group identifies three interdependent domains through which research, education and capacity development activities are organized. These domains are: Water Policy, Water Law and Water Politics. Water Governance Blog 'Flows' Flows aims to promote an open and critical space to discuss water governance issues.
