The sheltered coral gardens of the Red Sea are some of the finest in the world, with excellent growth and usually, equally excellent visibility, making for great images. On this dive I decided to focus on some of the more massive coral colonies. My first is this amazing Turbinaria, which if you look closely is host to several tridacnids.

Some Huge Red Sea Corals - Reefs.com

It is common on fringing coral reefs in the Red Sea. Elsewhere it is replaced by Arothron nigropunctatus (the Blackspotted Puffer). However, some experts believe these to be the same species. They are called pufferfish because when threatened they greatly inflate themselves with water, making themselves look much larger than they usually are.
