Iso Dis 45001 2

ISO/DIS 45001.2 is based on Annex SL - the new ISO high level structure (HLS) that brings a common framework to all management systems. This helps to keep consistency, align different management system standards, offer matching sub-clauses against the top level structure and apply common language across all standards.

ISO/DIS 45001 section 6.1.2 identifies the requirements for hazard identification and assessment of OH&S risks, and overall, this process is the same as is currently required in OHSAS 18001. For a well-functioning OH&SMS you still need to identify what hazards are presented by your processes, and then assess the risk these hazards present.

DIS/ISO 45001 hazards vs. risks: What is the difference?

DIS/ISO 45001 lays the accountability for the performance of the OH&S system squarely at the door of the organization's top management, but does assert that top management can authorize responsibility for reporting on the OH&S performance to "an individual (sometimes referred to as the management representative), a member of top management or several individuals."
