Java is the more popular of the two when it comes to mobile development, which is why knowledge of Java is a prerequisite for our mobile development track. .NET /C# is more popular in web applications, in part because of the great support and design of Microsoft's .NET framework.

### Java Bootcamp | Java Training & Development | The Software ...

Programming is learning to solve problems using the right tools for the job. If you just learn one framework, you're only learning one way of thinking about problem solving. I mentioned previously that bootcamp graduates are often done a disservice when programs teach them one framework, trapping them in that framework's conventions.
