The KAP 140 autopilot elevator trim system supplies automatic adjustment of elevator trim during normal autopilot operation. The autopilot elevator trim system also supplies the pilot with a Manual Electric Trim (MET) system when the autopilot is not engaged. The MET system is controlled by using the DN-UP switches on the control wheel.

The KAP 150 Auto-Pilot is a 2-axis auto-pilot without a flight director that is no longer in production. Manuals for the auto-pilot are available on the Internet (it's part of the family of KFC 150, KAP 150 and KAP 100 auto-pilots all in the same manual). It can be connected to a KG107 (DG) and KI 204 (CDI) or a KI525A (HSI).

The KAP 140 started in most R models as a single axis autopilot, having only heading control. It still utilized NAV mode and APCH mode, coupling to CDI number 1. Like all KAP 140s, when the autopilot was first activated, it started in ROL mode, basically acting as a wing leveler (sidenote: have any pilots actually ever
