The Nikon S8100 is very quick to find focus, locking onto your target in less than 0.2 seconds, regardless of the lighting conditions or which end of the zoom range you're using. Very impressive given that the S8100 is using a contrast AF system, which is traditionally slower than the phase detection system that most DSLR cameras use.

To confirm, for anyone else looking into the issue. This happened to me before, as well. The mode for "HS 720" @ 60 fps does not record sound on my Nikon Coolpix. I thought I was getting a higher framerate, but should have used the "HD 720" @ 30fps to get the lesser space and slightly better motion profile.
