Section 25-2: Plant Responses Plant tropisms include gravitropism, phototropism, and thigmotropism. Each of these responses demonstrates the ability of plants to respond effectively to conditions in which they live. Photoperiodism in plants is responsible for the timing of seasonal activities such as flowering and growth.

Section 25 of the Safe Food for Canadians Regulations (SFCR) applies to meat products; imported meat products and meat products prepared within Canada. The meat products are grouped into 2 categories: Mixtures. a mixture is a food that contains ready-to-eat (RTE) meat products with other non-meat ingredients (for example, meat stew, tourtière, pepperoni pizza)

Understanding the meat product exceptions under section 25 ...

Daily and Seasonal Responses. Plants also detect and respond to the daily cycle of light and darkness. For example, some plants open their leaves during the day to collect sunlight and then close their leaves at night to prevent water loss. Environmental stimuli that indicate changing seasons trigger other responses. Many plants respond to the days growing shorter in the fall by going dormant.
